### **Aqualine Professional Standards (The Fine Print)**

(\* ) Rates Policy: Prices are for Labour & First-Fix Materials (Pipes, fittings, sealants), and assume like-for-like replacement with functional, accessible pipework.

Retail Transparency: High-value fixtures (Quookers/Tanks/Suites) invoiced at retail cost with no hidden markups.

System Integrity: Every Aqualine install is pressure tested and backed by our 12-month Aqualine Guarantee.

Emergency Call-Out: (Inc. 1st Hour) £195

Technical Survey / Diagnostic: £110 (Waived if a Tier 4 bundle is booked).

### **Scope of Rates & Variations**

Non-Exhaustive Nature: This rate card provides a standardized pricing framework for typical installations. It is non-exhaustive and intended for guidance.

Site-Specific Quotations: Final billing is subject to a site-specific assessment. We reserve the right to provide a bespoke quotation for works involving non-standard fixtures, restricted access, or specialist architectural requirements.

Unforeseen Variations: If, during the course of work, hidden defects or structural complications are discovered (e.g., collapsed internal waste pipes, illegal previous wiring), work will cease and a Variation Order will be issued for approval before proceeding.

Diagnostic Fees: Where a fault cannot be identified visually, a Diagnostic Fee applies for the first hour of investigation.

### **Pre-Existing System & Pressure Testing Disclaimer**

System Integrity: To comply with British Standards (BS EN 806), all new installations must be hydrostatically pressure-tested.

Liability Limit: Aqualine Plumbing is responsible only for the new components and pipework installed by us. We cannot be held liable for the failure of existing pipework, joints, or

fixtures elsewhere in the property that may be exposed during standard testing or re-pressurization.

**Consequential Loss:** We do not accept liability for flood damage or consequential loss resulting from the failure of pre-existing plumbing systems.

**Pre-Test Survey:** We conduct a visual inspection of visible pipework prior to testing. If we identify high-risk existing plumbing, we reserve the right to decline a high-pressure test and will notify the client of the risks.

Instructions received from a Managing Agent are accepted on the basis that the Agent has the Landlords authority to agree to these Terms & Conditions.
